-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Objections*

1. Claims 1-3 are objected to because of the following informalities: the phrase "the room" on line 9 of claim 1 lacks proper antecedent basis. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Mistopoulos et al.

Mistopoulos et al discloses a seal structure of a door mirror mounting portion comprising: a mirror base portion (Fig. 6, 248), a seal member held between the mirror base portion and the door panel (36), and a weather strip (38) provided in the door panel and sealing a gap between the door panel and a front pillar, wherein a surface of the door panel to which the mirror base is mounted is offset to an inner side of the room from a general surface other than the door mirror mounting portion, and

Art Unit: 2872

the seal member is extended to a side of the front be brought into contact with the weather strip and closes a gap between the mirror base portion and the front pillar (see Fig. 6).

#### ***Allowable Subject Matter***

4. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: claims are allowable over the prior art at least for the reason that the prior art does not teach or reasonably suggest the weather strip that is pressed to the front pillar by the seal member when closing the door as set forth in the claimed combination.

#### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Namba et al discloses a sealing structure for a door mirror.
